Ajhay

👤 Profile Summary

Detail-oriented Web Developer with a passion for creating visually appealing and user-friendly websites. Proficient in front-end and back-end technologies, with a strong foundation in coding and problem-solving. Skilled in developing responsive web applications that enhance user experience and meet business objectives.

💼 Work Experience

• Web Developer

- Developed and maintained responsive websites using HTML, CSS, and JavaScript
- Collaborated with designers and project managers to ensure seamless integration of design and functionality
- Optimized website performance and user experience through efficient coding practices
- Conducted thorough testing and debugging to identify and resolve issues promptly
- Implemented best practices in web development to ensure cross-browser compatibility and accessibility
- Stayed up-to-date with industry trends and emerging technologies to enhance skills and stay competitive in the field

• Back End developer

- Developed and maintained server-side logic for various web applications and services
- Implemented efficient algorithms and data structures to optimize system performance
- Collaborated with front end developers to integrate user-facing elements with server-side logic
- Ensured the scalability and security of backend systems through rigorous testing and code reviews
- Utilized programming languages such as Java, Python, or Node.js to create robust back end solutions
- Managed databases and data storage solutions to support application functionality
- Stayed updated on industry trends and best practices in back end development to drive continuous improvement in projects

• Full stack

- Led the development of end-to-end web applications, ensuring seamless integration of front-end and back-end components
- Implemented responsive design principles to optimize user experience across various devices

- Collaborated with cross-functional teams to gather requirements, design solutions, and deliver high-quality software products
- Utilized a wide range of technologies such as HTML, CSS, JavaScript, Node.js, and SQL to build scalable and robust applications
- Conducted code reviews, performed testing, and resolved technical issues to maintain code quality and application performance
- Stayed current with industry trends and best practices to continuously improve development processes and methodologies
